• Program

Kelly Coffin introduced Laurie Church and Meghan Way

Laurie Church and Meghan Way, Tecumseh Public Schools, presenting on Multi-Tier System of Support.

- What is MTSS? – Integrated system of support for instructional practices. A system based approach to meeting the needs for all learners.
- In the past, we have been reactive. Now, we have a preventative approach – including students who need acceleration.
- Use of a data management system to store data. Data Warehouse is a one stop shop and takes the guess work out of student progress.
- Building principle – Switch from “fixing the student” to “fixing the system”.
- Developed a graphic to represent our work – continuous process.
- TPS commitment to students includes a vigorous and research based curriculum and data will be used to inform instruction decisions. We are working together as a team to meet the needs of students.
- A manual has been developed for staff to walk through the process.
- This is the pilot year. Will eventually be District wide.
- Will make changes according to feedback.
- The Elementary schools have been completed and they are working on Middle and High School programs.
